Volume 141 1984

Table of Contents

No. 1 1–240 issued on May 2, 1984
No. 2 241–440 issued on May 15, 1984
No. 3 441–660 issued on June 1, 1984

Nucleic acids, protein synthesis, and molecular genetics

Biosynthesis and processing of phytohemagglutinin in developing bean cotyledons
A. Vitale, A. Ceriotti, R. Bollini, and M. J. Chrispeels 97–104

Isolation of short interspersed repetitive DNA sequences present in the regions of initiation of mammalian DNA replication
B. Anachkova, M. Todorova, L. Vassilev, and G. Russev 105–108

Replication of M13mp7 single-stranded DNA *in vitro* by the 9-S DNA polymerase α from calf thymus
F. Grosse and G. Krauss 109–114

Processing of the 3′ sequence extensions upon the 5S rRNA of a mutant yeast in *Xenopus laevis* germinal vesicle extract
P. W. Piper, N. Patel, and A. Lockheart 115–118

A nuclear-Overhauser-enhancement study of the solution structure of a double-stranded DNA undecamer comprising a portion of the specific target site for the cyclic-AMP-receptor protein in the *gal* operon. Sequential resonance assignment
G. M. Clore and A. M. Gronenborn 119–129

Cytoplasmic mRNA-protein complexes of chicken muscle cells and their role in protein synthesis
J. Bag 247–254

Structural organization of the 5′ region of the human thyroglobulin gene
H. M. Targovnik, V. Pohl, D. Christophe, B. Cabrer, H. Brocas, and G. Vassart 271–277

Purification and subunit structure of RNA polymerase II from different stages of *Artemia* development
J. Cruces, V. Diaz, M. Quintanilla, J. Renart, and J. Sebastian 279–282

Yeast RNA polymerase III. Chromatographic, catalytic and DNA-binding properties are highly dependent on the type of anion
O. S. Gabrielsen, K. E. Andersen, and T. B. Øyen 345–350

Nucleotide sequence of the *sucA* gene encoding the 2-oxoglutarate dehydrogenase of *Escherichia coli* K12
M. G. Darlison, M. E. Spencer, and J. R. Guest 351–359

Nucleotide sequence of the *sucB* gene encoding the dihydrolipoamide succinyltransferase of *Escherichia coli* K12 and homology with the corresponding acetyltransferase
M. E. Spencer, M. G. Darlison, P. E. Stephens, I. K. Duckenfield, and J. R. Guest 361–374

Synthesis of RNA I by the RNA polymerase from *Micrococcus luteus* on the *Escherichia coli* plasmid pBR322
R. P. Brack, H. Domdey, and G. R. Hartmann 453–459

Polysomal and cytoplasmic mRNP particles containing 7S(L) RNA
M. Lieser and P. C. Heinrich 461–464

DNA fragment conformations. A ^{1}H-NMR conformational analysis of the d(G-G)-chelated platinum-oligonucleotide d(A-T-G-G)*cis*Pt
J.-M. Neumann, S. Tran-Dinh, J.-P. Girault, J.-C. Chottard, T. Huynh-Dinh, and J. Igolen 465–472

Alternative conformational states in the ribosome-associated 5.8S RNA
A. C. Lo, W. Liu, and R. N. Nazar 549–553

Methylated proteins and amino acids in the ribosomes of *Saccharomyces cerevisiae*
J. Lhoest, Y. Lobet, E. Costers, and C. Colson 585–590

Protein chemistry and structure

Aldehyde dehydrogenase from human liver. Primary structure of the cytoplasmic isoenzyme
J. Hempel, H. von Bahr-Lindström, and H. Jörnvall 21– 35

The cytoplasmic isoenzyme of horse liver aldehyde dehydrogenase. Relationship to the corresponding human isoenzyme
H. von Bahr-Lindström, J. Hempel, and H. Jörnvall 37– 42

Structural analysis of the Ss sialoglycoprotein specific for Henshaw blood group from human erythrocyte membranes
W. Dahr, M. Kordowicz, W. J. Judd, J. Moulds, K. Beyreuther, and J. Krüger 51– 55

Polymorphism of α-actinin from human blood platelets. Homodimeric and heterodimeric forms
Y. Gache, F. Landon, and A. Olomucki 57– 61

Photoaffinity labeling of the glucagon receptor with a new glucagon analog
D. E. Wright, R. Horuk, and M. Rodbell 63– 67

Primary structures of the α-crystallin A chains of twenty-eight mammalian species, chicken and frog
W. W. de Jong, A. Zweers, M. Versteeg, and E. C. Nuy-Terwindt 131–140

Characterization of a novel killer toxin encoded by a double-stranded linear DNA plasmid of *Kluyveromyces lactis*
Y. Sugisaki, N. Gunge, K. Sakaguchi, M. Yamasaki, and G. Tamura 241–245

A high-resolution proton nuclear-magnetic-resonance investigation of carp hemoglobin. Conformational differences between carp and human normal adult hemoglobins in solution
C. Dalvit, S. Miura, A. De Young, R. W. Noble, M. Cerdonio, and C. Ho 255–259

Rabbit pepsinogens. Purification, characterization, analysis of the conversion process to pepsin and determination of the NH_2-terminal amino-acid sequences
T. Kageyama and K. Takahashi 261–269

NMR studies of electron transfer mechanisms in a protein with interacting redox centres: *Desulfovibrio gigas* cytochrome c_3
H. Santos, J. J. G. Moura, I. Moura, J. LeGall, and A. V. Xavier 283–296

NMR studies of a dihaem cytochrome from *Pseudomonas perfectomarinus* (ATCC 14405)
I. Moura, M. C. Liu, J. LeGall, H. D. Peck Jr, W. J. Payne, A. V. Xavier, and J. J. G. Moura 297–303

NMR and electron-paramagnetic-resonance studies of a dihaem cytochrome from *Pseudomonas stutzeri* (ATCC 11607) (cytochrome *c* peroxidase)
J. Villalain, I. Moura, M. C. Liu, W. J. Payne, J. LeGall, A. V. Xavier, and J. J. G. Moura 305–312

Dissociation of ribulose-1,5-bisphosphate carboxylase/oxygenase from spinach by urea
G. Voordouw, S. M. van der Vies, and P. J. Bouwmeister 313–318

Interconversion from 3Fe into 4Fe clusters in the presence of *Desulfovibrio gigas* cell extracts
J. J. G. Moura, J. LeGall, and A. V. Xavier 319–322

Cobalt(II) as an NMR probe for the investigation of the coordination sites of conalbumin
I. Bertini, C. Luchinat, L. Messori, and A. Scozzafava 375–378

Boar acrosin is a two-chain molecule. Isolation and primary structure of the light chain; homology with the pro-part of other serine proteinases
R. Fock-Nüzel, F. Lottspeich, A. Henschen, and W. Müller-Esterl 441–446

Lack of N–F transition in the N-terminal fragment (domain I+II) of bovine serum albumin
M. Y. Khan and A. Salahuddin 473–475

Modification of amino groups in EF-Tu · GTP and the ternary complex EF-Tu · GTP · valyl-$tRNA^{Val}$
B. Antonsson and R. Leberman 483–487

Conformation of the carboxy-terminal region of the Aα chain of fibrinogen as elucidated by immunochemical analyses
C. S. Cierniewski, E. F. Plow, and T. S. Edgington 489–496

Purification and characterization of thioredoxin from the N_2-fixing cyanobacterium *Anabaena cylindrica*
S.-M. Ip, P. Rowell, A. Aitken, and W. D. P. Stewart 497–504

Electron-paramagnetic-resonance studies of manganese(II) complexes with elongation factor Tu from *Bacillus stearothermophilus*. Observation of a GTP hydrolysis intermediate state complex
H. R. Kalbitzer, R. S. Goody, and A. Wittinghofer 591–597

Stoichiometry of microtubule-associated protein (MAP2): tubulin and the localisation of the phosphorylation and cysteine residues along the MAP2 primary sequence
R. G. Burns and K. Islam 599–608

The multiple phosphorylation of the microtubule-associated protein MAP2 controls the MAP2: tubulin interaction
R. G. Burns, K. Islam, and R. Chapman 609–615

Enzymology

Pseudo-catalytic degradation of hydrogen peroxide in the lactoperoxidase/H_2O_2/iodide system
M. Huwiler and H. Kohler 69– 74

Rat-liver lysosomal sialidase. Solubilization, substrate specificity and comparison with the cytosolic sialidase
T. Miyagi and S. Tsuiki 75– 81

Composition of cytochrome P-450 isozymes from hepatic microsomes of C57BL/6 and DBA/2 mice assessed by warfarin metabolism, immunoinhibition, and immunoelectrophoresis with anti-(rat cytochrome P-450)
L. S. Kaminsky, G. A. Dannan, and F. P. Guengerich 141–148

Isolation of a homogeneous glucosidase II from pig kidney microsomes
D. Brada and U. C. Dubach 149–156

Solvent isotope effects on the glucokinase reaction. Negative co-operativity and a large inverse isotope effect in ^2H_2O
D. Pollard-Knight and A. Cornish-Bowden 157–163

Studies in bile salt solutions. The effect of pH on the cholate and taurocholate stimulation of human milk lipase catalyzed hydrolysis of *p*-nitrophenylacetate
C. J. O'Connor and R. G. Wallace 379–383

Occurrence of *S*-adenosylhomocysteine hydrolase in prokaryote cells. Characterization of the enzyme from *Alcaligenes faecalis* and role of the enzyme in the activated methyl cycle
S. Shimizu, S. Shiozaki, T. Ohshiro, and H. Yamada 385–392

Isolation of active and inactive forms of isocitrate dehydrogenase from *Escherichia coli* ML308
A. C. Borthwick, W. H. Holms, and H. G. Nimmo 393–400

Partial purification and properties of isocitrate dehydrogenase kinase/phosphatase from *Escherichia coli* ML308
G. A. Nimmo, A. C. Borthwick, W. H. Holms, and H. G. Nimmo 401–408

Monoclonal antibodies to human prolyl 4-hydroxylase
M. Höyhtyä, R. Myllylä, J. Piuva, K. I. Kivirikko, and K. Tryggvason 477–482

Tendamistat (HOE 467), a tight-binding α-amylase inhibitor from *Streptomyces tendae* 4158. Isolation, biochemical properties
L. Vértesy, V. Oeding, R. Bender, K. Zepf, and G. Nesemann 505–512

A multifunctional fermentative alcohol dehydrogenase from the strict aerobe *Alcaligenes eutrophus*: purification and properties
A. Steinbüchel and H. G. Schlegel 555–564

Isolation of three cyclic-AMP-independent acetyl-CoA carboxylase kinases from lactating rat mammary gland and characterization of their effects on enzyme activity
M. R. Munday and D. G. Hardie 617–627

Mitochondrial adenylate kinase (AK2) from bovine heart. Homology with the cytosolic isoenzyme in the catalytic region
R. Frank, M. Trosin, A. G. Tomasselli, G. E. Schulz, and R. H. Schirmer 629–636

Carbohydrates, lipids and other natural products

The primary structure of teichuronic acid in *Bacillus subtilis* AHU 1031
T. Yoneyama, Y. Araki, and E. Ito 83– 89

Structure of the capsular antigen of *Neisseria meningitidis* serogroup H
A. van der Kaaden, J. I. M. van Doorn-van Wakeren, J. P. Kamerling, J. F. G. Vliegenthart, and R. H. Tiesjema 513–519

Characterization of *Crithidia fasciculata* oligosaccharide-lipid and its elongation by bovine mammary microsomes
A. Katial, C. Prakash, and I. K. Vijay 521–526

Changes of glycolipids dependent on cell density of Ehrlich ascites carcinoma cells
N. V. Prokazova, S. L. Kocharov, G. I. Shaposhnikova, N. D. Zvezdina, and L. D. Bergelson 527–529

Physical biochemistry

Conformational analysis of the single-helical DNA fragment d(T-A-A-T) in aqueous solution. The combined use of NMR proton chemical shifts and coupling constants obtained at 300 MHz and 500 MHz
J. R. Mellema, A. K. Jellema, C. A. G. Haasnoot, J. H. van Boom, and C. Altona 165–175

The use of two-dimensional nuclear-magnetic-resonance spectroscopy and two-dimensional difference spectra in the elucidation of the active center of *Megasphaera elsdenii* flavodoxin
C. T. W. Moonen, R. M. Scheek, R. Boelens, and F. Müller 323–330

Membranes and bioenergetics

Assay of ATP synthesis using single giant mitochondria
M. L. Campo, C. L. Bowman, and H. Tedeschi 1– 4

Protonmotive force in giant mitochondria
M. L. Campo and H. Tedeschi 5– 7

Calmodulin-dependent protein phosphorylation and calcium uptake in rat-liver microsomes
K. S. Famulski and E. Carafoli 15– 20

Membrane crystals of Ca^{2+}-ATPase in sarcoplasmic reticulum of fast and slow skeletal and cardiac muscles
L. Dux and A. Martonosi 43– 49

Modification of the cation selectivity filter and the calcium receptor of the Ca-stimulated K channel in resealed ghosts of human red blood cells by low levels of incorporated trypsin
P. G. Wood and H. Mueller 91– 95

Target size analysis and molecular properties of Ca^{2+} channels labelled with [^{3}H]verapamil
A. Goll, D. R. Ferry, and H. Glossmann 177–186

Surface properties of bacterial sulfhydryl-activated cytolytic toxins. Interaction with monomolecular films of phosphatidylcholine and various sterols
J. E. Alouf, C. Geoffroy, F. Pattus, and R. Verger 205–210

Biliary transport of glutathione disulfide studied with isolated rat-liver canalicular-membrane vesicles
T. Akerboom, M. Inoue, H. Sies, R. Kinne, and I. M. Arias 211–215

Coupling of ATP synthesis and methane formation from methanol and molecular hydrogen in *Methanosarcina barkeri*
M. Blaut and G. Gottschalk 217–222

Prolipoprotein modification and processing in *Escherichia coli*. A unique secondary structure in prolipoprotein signal sequence for the recognition by glyceryl transferase
C.-Z. Giam, T. Chai, S. Hayashi, and H. C. Wu 331–337

Characterization of the vacuolar ATPase activity of the crassulacean-acid-metabolism plant *Kalanchoë daigremontiana*
J. A. C. Smith, E. G. Uribe, E. Ball, S. Heuer, and U. Lüttge 415–420

Respiratory mutants of *Azotobacter vinelandii* with elevated levels of cytochrome *d*
M. J. McInerney, K. S. Holmes, P. Hoffman, and D. V. Der Vartanian 447–452

Kinetics of reduction by substrate or dithionite and heme-heme electron transfer in the multiheme hydroxylamine oxidoreductase
A. B. Hooper, V. M. Tran, and C. Balny 565–571

Purification and characterization of the rotenone-insensitive NADH dehydrogenase of mitochondria from *Arum maculatum*
N. D. Cook and R. Cammack 573–577

Characterization, solubilization, affinity labeling and purification of the cardiac Na^+ channel using *Tityus* toxin γ
A. Lombet and M. Lazdunski 651–660

Cellular biochemistry and metabolism

Alterations of oxidative phosphorylation reactions in mitochondria isolated from hypothyroid rat liver
I. Ezawa, M. Yamamoto, S. Kimura, and E. Ogata 9–13

Na^+-dependent, α-adrenergic mobilization of intracellular (mitochondrial) Ca^{2+} in brown adipocytes
E. Connolly, E. Nånberg, and J. Nedergaard 187–193

Catabolite repression in yeasts is not associated with low levels of cAMP
P. Eraso and J. M. Gancedo 195–198

Influence of fatty acids on energy metabolism. 1. Stimulation of oxygen consumption, ketogenesis and CO_2 production following addition of octanoate and oleate in perfused rat liver
R. Scholz, U. Schwabe, and S. Soboll 223–230

Influence of fatty acids on energy metabolism. 2. Kinetics of changes in metabolic rates and changes in subcellular adenine nucleotide contents and pH gradients following addition of octanoate and oleate in perfused rat liver
S. Soboll, S. Gründel, U. Schwabe, and R. Scholz 231–236

Depletion of blood plasma cytidine due to increased hepatocellular salvage in D-galactosamine-treated rats
A. Holstege, D. Manglitz, and W. Gerok 339–344

The regulatory properties of isocitrate dehydrogenase kinase and isocitrate dehydrogenase phosphatase from *Escherichia coli* ML308 and the roles of these activities in the control of isocitrate dehydrogenase
G. A. Nimmo and H. G. Nimmo 409–414

Preparation of monoclonal antibodies against glycoprotein IIIa of human platelets. Their effect on platelet aggregation
J. A. Melero and J. Gonzalez-Rodriguez 421–427

Receptor modulating properties of an antibody directed against the epidermal growth factor receptor
M. Das, B. Knowles, R. Biswas, and S. Bishayee 429–434

The efficiency of oxidative phosphorylation and the rapid control by thyroid hormone of nicotinamide nucleotide reduction and transhydrogenation in intact rat liver mitochondria
J. Corrigall, B. S. Tselentis, and J. Mowbray 435–440

Synthesis of prenyl lipids in cells of spinach leaf. Compartmentation of enzymes for formation of isopentenyl diphosphate
K. Kreuz and H. Kleinig 531–535

On the biosynthesis of ubiquinones in plant mitochondria
F. Lütke-Brinkhaus, B. Liedvogel, and H. Kleinig 537–541

Possible role of P_i supply in mitochondrial actions of glucagon
E. A. Siess, R. I. Kientsch-Engel, F. M. Fahimi, and O. H. Wieland 543–548

The hemolytic effect of *Salmonella typhi* Ty 2 porins
I. Calderon, S. R. Lobos, and G. C. Mora 579–583

Enhancement of long-chain acyl-CoA hydrolase activity in peroxisomes and mitochondria of rat liver by peroxisomal proliferators
R. K. Berge, T. Flatmark, and H. Osmundsen 637–644

Regulation of peripheral insulin/glucagon levels by rat liver
H.-J. Balks and K. Jungermann 645–650

Developmental biochemistry and immunology

Primary activation of cytosolic phospho*enol*pyruvate carboxykinase gene in fetal rat liver and the biogenesis of its mRNA
D. Mencher, H. Cohen, N. Benvenisty, O. Meyuhas, and L. Reshef 199–203

Correspondence

Comments on: Polymorphism of serine-specific transfer ribonucleic acid. Influence of the temperature on the crystallization of serine-specific tRNA
W. A. Hendrickson, A. Liljas, and B. E. Strandberg

Reply to the comments
H. H. Paradies 237–239
